

NatureWet Organic Soil Wetter

NatureWet is a natural/Organic soil wetting agent produced from several plant species including the Yucca plant.

The saponin extracts act as a powerful natural surfactant, enhancing the penetration of water especially in hard, compacted or alkaline soils.

NatureWet

- ◆ Breaks down surface tension
- ◆ Increases percolation
- ◆ Increases moisture retention
- ◆ Stimulates roots
- ◆ Increases cell wall permeability
- ◆ Stimulates microbial activity on the surface of roots and seeds—
this activity stimulates moisture uptake & the rate of development of shoots & roots
- ◆ Is a natural plant extract. It is not antagonistic or toxic to plants
- ◆ Is biodegradable and has no harmful effects to the environment
